Client/Architect

Client : RAK Bank

Architect : Brewer Smith Brewer Gulf

The 20300 m² office facility is owned and operated by RAK Bank as their major corporate office in Dubai. This dedicated office building provides all B-O-H banking office needs of RAK Bank.

Originally intended to be LEED certified, the Client opted to implement and incorporate LEED requirements without going for actual LEED certification.

The fitted out floors provide extreme level of flexibility to meet rapidly working and changing floor space requirements of the Bank.

A Tier III, 500m² Data Center is part of the Building.

Mario Associates provided the complete design, and installation supervision of all the building services including the design and supervision of the Data Centre.
